Dear Harold –

With some luck, I should have some money by the end of the year and present you with a new, trouble free Cannon Copier –

Yarborough's short affidavit in 7 WCH 439-40 has nothing at all about a knocked down SS or FBI agent at Parkland, as you mentioned.

Judy Bonner's transcripts (DPD) end at 1:56 (Channel 1) and mark earlier on channel 2, I find nothing whatsoever on removal of the body.

Please give me a lead on where the complete transcript is published in WCH & E – There is nothing in the Exhibits – Price? Graves? Leaville? (I know those can't be right but maybe will jog your memory.)

Funeral directors are often real crooked. Since the U.S. actually paid $13,495 for the Britannia, $10,000 was added on, as the price was $3,495,

BUT perhaps the casket actually sent by O'Neal was a cheap "bronze colored plastic casket, as Kemp Clark wrote: "Plain," others

at Parkland called it.

We may have a colossal semantic problem here on some issues.

I still have to solve the "surgery to the top of the skull" (Siebert + O'Neill), which seems to be corroborated by statements (extensive) to me by Jenkins of an incised brain stem, 2) a deep slice into the brain, 2-3 cuts along fracture + suture lines to enlarge the large defect.

They claimed that the brain fell out into Humes hands.

It seems to me that its prima facia that the photo of the Rt. side of the head (lateral) is a painting, according to Humes placement of the large defect. The back of the head pic is problematical.

Lifton seems to use "laceration" to imply "incised." I don't think he knows what lacerations means (to tear or mangle).

I'm tired of being everybody's target. Did you know the NOW file was mine + before I drove out there in that dangerous storm?

Do you know what Rick is really up to? I think there are a lot of hoaxes here. There are a lot of bad people in this "critical community" and they made me the target.

Best to you and Lillian,

Harry

P.S. I've been ill ever since I saw you.
